

Source and geometry
orbix + skyscapes + zodi
frame, epoch, spectral density

spectral light

Optical response per wavelength
yippy / physicaloptix + optixstuff
area, throughput, spatial / dispersion response

wavelength-resolved photon rates

Electron expectation and variance
jaxedith forecasts / detector models
QE before spectral sum; actual frame cadence

resolved count / noise model

Realized data and reporting
observation sampler + reduction adapters
coronagraphphoto / coronachrome / coronalyze
values or null; covariance; response identity

public evidence

Assumed-model inference
photomancy
normalized likelihood; posterior coordinates
